### **Low costs for businesses and affordable prices for customers.**

To make travel more comfortable, many aids are available such as eye masks, inflatable neck pillows, and ear plugs. Yet nothing is comparable to the unique Economy Class Footrest. With low production costs and high profit margins, the Economy Class Footrest will satisfy both customers and companies alike. This product represents a completely untapped portion of the marketplace, with its own niche in the travel industry.

### **Simple, innovative design for ease of use.**

Deep Vein Thrombosis (DVT), also known as Economy Class Syndrome, is a blood clot (thrombosis) that forms in the deep vein system of the lower leg, usually between the ankle and the upper calf. Exercising with the Economy Class Footrest and keeping hydrated during long flights significantly reduces the risk of DVT.

### **Reduce the risk of serious health problems.**

The Economy Class Footrest is an easy to use, portable device conceived and created by a world traveler and medical professional. It can be quickly and inexpensively manufactured with a wide variety of materials and options. The Economy Class Footrest is made light, simple, and inexpensive. It's very easy to use, install, clean, and maintain.
